## SKILLS AND TOOLS

- HTML
- CSS
- Javascript
- Typescript
- React
- Next
- Tailwind
- Framer Motion
- MongoDB

## FRONTEND DEVELOPER

I am an aspiring frontend developer looking for an entry job. I have built several responsive websites using React, Next, Tailwind, Javascript and hope to contribute to a highly collaborative work environment and provide customer satisfaction.

## PROJECTS

### Audiophile

- Built a responsive, multipage e-commerce website selling imaginary audio products using React and Tailwind
- Used React's state management to add/remove products, edit product quantities, and see correct checkout totals in the cart
- CSS-Grid-based layout for categorized audio products and individual product information pages

### Product Feedback

- Built a responsive, multipage CRUD website collecting product feedback using Next and Tailwind
- Used Next's built-in API routes and modified local JSON file to add/remove/edit/read feedback
- Used Next's built-in routing to switch between individual feedback pages where inside one can interact with the comment section

### Trello Clone

- Built a responsive, multipage CRUD Trello Clone using Next and Tailwind
- Connected to MongoDB database in Next's built-in API routes to add a new board, and within each board add new lists and cards
- Used Next's built-in routing to switch between individual cards where inside one can add labels, edit card description, or add comments

### Designo

- Built a responsive, multipage design agency website focused on creating imaginary designs using React and Tailwind
- CSS-Grid-based layout for individual preview designs and company information pages

## EXPERIENCE

### Data Science Tutor, UCSD - 2019-2021

- Developed homework and project questions and tested corner cases in Python
- Assisted students on table manipulation, hypothesis testing, bootstrapping

## EDUCATION

### University of California - San Diego

### BS in Data Science, 2018-2021
